

PIPETTE TIPS

UPGRADE YOUR LABORATORY EXPERIENCE

These high-quality pipette tips are designed to meet the demands of modern scientific research. With 1000 pieces per pack, you'll have an ample supply to tackle any experiment or analysis. Crafted with precision, these crystal tips ensure accurate and precise sample delivery every time. The E1009 tips are compatible with Eppendorf type pipettes, making them a versatile choice for any lab setting. Whether you're conducting DNA sequencing or protein purification, these tips will deliver exceptional results.

Featuring a secure fit, the tips provide a leak-proof seal to prevent any cross-contamination between samples. This ensures the integrity of your research and eliminates the risk of compromised data. Additionally, the crystal-clear design allows for easy visual monitoring of liquid levels, saving you time and effort during pipetting. With their exceptional quality and performance, these pipette tips are a must-have for any scientist or researcher. Trust in their reliability and precision, and achieve accurate results with ease.
